

ELECTRONIC PROPERTY AUCTION MANAGEMENT SYSTEM

SOLUTION DESCRIPTION

With the help of the developed Electronic Property Auction Management System auctions are conducted on the Internet and the remote participation in live auctions is possible. The more economic and convenient property acquisition form expands the circle of auction participants by selling more auction items. The selling process became the most transparent as the possibilities to secretly agree, and in this way to reduce the price artificially were removed.

BENEFITS

- Online auctions management
- More transparent procedure
- Information for participants about the bidding process, objects and results
