

FREIGHT AND GOODS INFORMATION SYSTEM (KIPIS)

SOLUTION DESCRIPTION

Freight and Goods Information System provides tools and services to transfer and process information on freight movement via the port of Klaipeda and transmit the declaration data via the Web interface directly to the Customs Department system without going to the customs post. It helps to assess the risk of the arriving cargo in advance and to determine whether it needs to be inspected. In addition, the Customs will be able to direct the EU cargos in advance into the so called green corridor.

BENEFITS

- Data exchange amongst the system users to conduct procedures
- Electronic data exchange with the stevedoring companies
- Provision of information

ABOUT COMPANY

Alna Group provides professional solutions that cover all IT-related functions, including the formation of IT infrastructure, the selection of optimal software, the provision of professional business-management solutions and the maintenance of IT infrastructure. Today, more than 500 organisations rely on our solutions, and not only in Lithuania.
