

A "SINGLE-WINDOW" INFORMATION SYSTEM FOR ALYTUS CITY MUNICIPALITY

SOLUTION DESCRIPTION

A "single-window" information system is based on Asseco Lithuania's proprietary software solution: Avilys (Beehive) document and process management system. Its functionalities include: services management, task and document management, contract management, legal acts preparation and alignment, meeting planning and organization, making reports. The system allows signing documents by e-signature. Avilys enables configuring and providing about 180 e-services (G2C, G2B, G2G) in various fields: finance, legal issues, education, culture, etc. It makes an efficient and transparent document process management.

BENEFITS

- Increasing efficiency of the services provided by the municipality.
- Easier and more transparent process and document management.
- Ability to sign documents by e-signature.
- Better communication with the society.
- More efficient work of the municipality.
