INFORMATION SYSTEM FOR CONSTRUCTION PERMITS AND STATE SUPERVISION OF CONSTRUCTION (IS INFOSTATYBA)

SOLUTION DESCRIPTION

The purposes of the system are: to provide public e-services (G2C, G2B, G2G): accepting applications, issuing construction permits, permits to continue the suspended construction, certificate of construction completion, etc., to collect, process, store, systematize and use data about a status of national constructions and state supervision of construction, provide data to the state authorities for performing the functions regulated by legal acts and provide data to the state registers, legal and natural persons.

BENEFITS

- Completely electronic process of issuing permits: submitting requests in portal, request investigation in internal subsystem, downloading the signed e-document in portal.

- Storing GIS documents and submitting them for review and verification.

- Payment for services via the State Information Resources Interoperability Platform.

- Data exchange with various external/internal information systems and registries.

- Functionality of signing by e-signature.

- The developed mobile application allows to submit complaints and track the status of the submitted requests.

- About 60% less time spent for getting a construction document.

- Number of the submitted requests increases yearly by over 50%.
