

LEGISLATION INFORMATION SYSTEM AND LEGAL ACTS REGISTRY FOR THE OFFICE OF THE PARLIAMENT

SOLUTION DESCRIPTION

Legislation Information System covers a full life cycle of legal acts, from a preparation of a legal act draft, it's review and approval cycles (process includes review by different government institutions, ministries and Parliament committees), publishing a draft for citizens, management of public comments and suggestions, supporting electronic signature, and transferring the signed legal acts to the Legal Acts Registry, where they are published. The system includes a software for managing content of legal act and a wide range of document format conversion.

BENEFITS

- A centralized, reliable and safe legislation data processing and storing on electronic space.
- Easier preparation and publishing of consolidated version of legal acts.
- Easier evaluation of the society comments and suggestions regarding legal acts.
- Better monitoring of legal regulation.
- Managing more efficiently a process of legal act preparation.
- Ability to sign legal acts by electronic signature.
- Increasing legislation quality, efficiency, openness and transparency.
