

OPEN INFORMATION, COUNSELLING AND GUIDANCE SYSTEM (AIKOS)

SOLUTION DESCRIPTION

System for administration of registries and databases of education (registries of Study Programmes; Education providers; Qualifications; Diplomas and Certificates; etc), software for information exchange with the Lithuanian Labour Exchange, Department of Statistics and Lithuanian labour market training authority, software for creating and regular updating of AIKOS website. The main task of the internet system is to join information from different databases of education system, systematize it and provide up-to-date information about the current professional qualifications, programs of studies, educational institutions, the registered and accepted education certificates and issued teaching licences, number of students/pupils and free jobs in Lithuania.

BENEFITS

- Enhanced efficiency in the management of the educational system,
- Optimization of the network of educational institutions,
- Decision-making on the basis of complete information on resources and possibilities of educational system,
- Optimal allocation of financial resources relating them to efficiency of activity of the educational institution,
- Involvement of pupils into an education process,
- The modern, innovative and active school ensuring a communication among teachers, learners and parents,
- Presentation of a more detailed information on the opportunities of further education in Lithuania for schoolchildren.
