

INSURANCE ACCIDENTS REGULATION SYSTEM

SOLUTION DESCRIPTION

System for management whole process of accidents' regulation. System collects all the accident's data, photos, messages, documents, expert reports, tasks and other related information. Within the system, all responsibilities might be managed, divided and delegated to different personnel and experts. The most important outcome – regulation process is faster, customers receive decision in less time and payment reaches them quicker. The system is based on Microsoft SharePoint technology, also it is tightly integrated with company's ERP system, CRM system and document scanning system.

BENEFITS

- Systems enforces faster decisions, quicker payments & happier customers;
- One repository for all accident's regulation tasks, documents, data, photos, messages and reports;
- Manages one of the most important processes of any insurance company;
- Makes the process run smoother and faster;
- Support for "non paper office" policy;
- Based on Microsoft SharePoint technology – standard platform applied to individual needs.

ABOUT COMPANY

The key to competence is deep specialisation, and deep specialisation is usually narrow. But today's business challenges demand complex, all-embracing solutions. How can this conflict be resolved? Blue Bridge Group combines the different IT competencies within a single corporate family. Each company in the group develops specialised competencies in great depth and subtlety, creating its own highly professional IT profile.
