

NATIONAL OR GOVERNMENTAL CSIRT ESTABLISHMENT

SOLUTION DESCRIPTION

National or Governmental Cyber Security Incident Response Teams (CSIRTs) serve as a trusted and central coordination points of contact for cyber security, aimed at identifying, defending, responding to and managing cyber threats. The service includes guidance through CSIRT documentation process, help with selecting the right services, building proper organizational structures, defining appropriate roles and responsibilities, selecting the right people, information technologies and equipment, defining network design, providing necessary training, defining operational procedures and establishing partnerships with other cyber security players.

BENEFITS

- Building national cyber defense capabilities;
- Bringing maturity to the country's digital economy;
- Having a central coordination point of contact for cyber security;
- Having a catalyst in organizing national cybersecurity resilience initiatives;
- Using internationally recognized CSIRT practices;
- Analysis of country's laws, politics, cultural, existing critical resources, trends;
- Preparation and implementation of capacity building activities.
