

INTEGRATED INFORMATION SYSTEM OF PENAL PROCESS (IISPP)

SOLUTION DESCRIPTION

IISPP system covers all penal processes: from registering a crime event (police or other investigation institutions, like jails, finance crimes investigation services, customs, borders, etc.) to all process actions in police, exchanging electronically information of Police with Office of the Prosecutor, all process regarding crime investigation in Prosecutor Office, and further all related information is passed to the Courts (system also includes Judges actions, like permits to start electronically spying (phone, e-mail) and others). IISPP promotes a better coordination, cooperation and mutual understanding between the criminal law authorities in Lithuania and other institutions in Latvia and Estonia.

BENEFITS

- One system – all pre-trial institutions operate with same criminal process data (documents, photos, videos).
- All crime dossier can be electronically signed and passed between the mentioned institutions, till the Court starts.
- Efficient search and data retrieval.
- Tools for process monitoring and reports.
- System performs checks against Code of Criminal Procedure.
- Data exchange with other systems/registers.
- Avoiding duplication of data and an efficient usage of resources.
- Faster and transparent pre-trial investigation.
