## STRATEGIC MANAGEMENT

### SOLUTION DESCRIPTION

Information system eSTRATEGY is designed for the public and business companies. The key advantage of this system – it facilitates an easier and more productive strategic planning. After the system is installed, managing authorities are able to manage the organizational performance indicators more efficiently and get analytical reports on the performance data in real time.

### BENEFITS

- Automated management of indicators and information;
- Significantly reduced management costs through:
  - Calculation and structuration procedures;
  - Automatic data imports;
- Obvious organizational management results;
- Consolidated management of business processes;
- Reduced risk through automatic monitoring and notifications.

### ABOUT COMPANY

“Algoritmu Sistemas” helps governmental organizations transform into digital organizations via consulting and development of efficient enterprise information systems with a focus to: national and regional tax administration, improving the tax collection, e-health and national health insurance, election management, national and regional waste management, and voice-controlled information systems.

“Algoritmu Sistemas” is controlled by INVL Technology – Nasdaq Vilnius listed closed-end investment in IT businesses company. INVL Technology managed companies operate as a cluster and implement joint projects in more than 50 countries worldwide.
