

Telecommunications Network Planning and Management

SOLUTION DESCRIPTION

Cellular Expert is a wireless network planning, optimization and management solution, available to the telecommunication industry since 1995. The software is distinctive for its versatile functionality, calculation precision, multi-technology, intuitive usage. It is built on powerful GIS platform – Esri ArcGIS. Cellular Expert allows users to design, optimize network and analyze information efficiently, to reduce capital expenses and operating cost, increase profitability, and improve the quality of customer support services.

BENEFITS

- Reduced capital expenses and operating cost by accurate network planning and optimization.
- Faster and easier task processing with automated tools and templates.
- Increased network planning accuracy in urban areas by 3D signal coverage
- Increased customer satisfaction by quicker solving of technical issues.
- Faster and easier business scenario modeling and reporting.
- Increased corporate collaboration efficiency with data sharing server solutions.
